THE KEY TO CONSISTENCY

www.speakerreadyroom.com

Many events feature multiple speakers, which can often result in a last-minute frenzy to integrate all the presentations into a coherent flow of information. Luckily, *www.speakerreadyroom.com* enables speakers to upload presentations to a Web site where a team of graphic designers and technicians integrate each one into the overall visual design of the event and ensure that it loads, is correctly formatted, and is compatible with the event's software and computers. Once reviewed and approved by the planner and the speaker, the presentation is queued and distributed to the event venue.
